

- Click the Settings Gear Icon to get to this screen.
- Alerts are sent to the Notifications section of the product. If you also want to receive alerts via email, you must first verify your email by clicking on the yellow "Verify your email address" (as seen on the screenshot). Repeat the process for Mobile Phone if you want to receive alerts via text.
- Alerts are triggered at login or once every 24 hours.

Simple Alerts automatically sets up your alerts with the most popular configuration. Just click on the alert to turn it on or off, or disable all alerts.

Switch to **Detailed Alerts** if you want to choose which accounts have alerts, what values trigger an alert and how alerts are delivered.
